

The map shows the location of dark dune fields and sand sheets on Mars between lat 65° and 90° S., covering about 75,000 km². Dune fields of similar size and quality to those included in the Equatorial and North Pole regions of MGD³ cover about 60,000 km² and are shown in red. More subtle sand features are shown in yellow. About 350 craters (outlined in black) contain dune fields
